

Service Offering Overview

# Journey to the Cloud

---

Tech Transformation

The Cloud. It is a promised land of lower operational costs, advanced capabilities, improved redundancy and security, and technological flexibility.

The path to this paradise is much less clear, paved with pitfalls, and different for every enterprise. Legacy systems, governance and controls, and even operating models may need to be re-thought to realize the value of cloud migration.

So what should your journey to the cloud look like?

# WHAT WE DO

From cloud strategy to cloud migration, our Further Advisory team develops and then executes transformational plans to keep your company ahead of the technology curve. A successful Journey to the Cloud necessitates a strategic approach that considers an organization's unique needs, challenges, and objectives.

We bring deep expertise in FinOps, data strategy, and large-platform transformations... and take it further. With an objective approach and penchant for pragmatism, we build comprehensive solutions that appreciate your organization's capacity for change, so that you can begin realizing value on Day 1.

## KEY COMPONENTS FOR YOUR JOURNEY TO THE CLOUD

### CLOUD OPERATING MODEL AT SCALE

Every cloud journey needs a structured approach to managing and automating cloud resources, processes & governance.

- How do you scale up your cloud presence?
- How are you building delivery pipelines?
- Where are you automating application infrastructure to best support your developers?

### CLOUD ADOPTION & EXITING THE DATA CENTER

Exiting the data center and adopting cloud computing go hand in hand.

- What capital investment is needed?
- Which assets should you move to deliver the most value?
- How do you minimize disruption during the transition?

### CLOUD FINOPS STRATEGY

Cloud cost optimization begins with a comprehensive FinOps Strategy.

- How do you establish cloud tagging policies to enable cost allocation and utilization insights?
- How can you optimize vendor contracts to align with cloud usage?
- How can you shift your organization from a capacity mindset to utilization management?

## OUR APPROACH

### CURRENT & FUTURE STATE ASSESSMENT

Where are you today?  
What do you want to be able to do tomorrow?  
What can we build on?

### TARGET MODEL DEFINITION & ROADMAP

How will people, systems, & governance be organized?  
How will we get there?

### CAPABILITY BUILD

Develop reporting, policy & controls, deliver processes for data & FinOps transformation

### CHANGE MANAGEMENT

Prepare business, technology and finance stakeholders for their new ways of working

## ABOUT FURTHER

We are a boutique management consultancy focused on converting strategic vision into business reality.

We always go the extra mile, equipping our clients with critical insights and plans for navigating challenges and accelerating change.
